

## METHOD AND APPARATUS FOR PRESENTING CONTENT DATA AND PROCESSING DATA

### ABSTRACT OF THE DISCLOSURE

5

a method and apparatus for presenting content data and processing data includes processing that begins by receiving modulated display data and content data via a channel coupling an external content processing device to a content display device. The processing continues by separating the modulated data from the content data. The processing proceeds to retrieving display data from the modulated data and processing the display data for display. The processing continues by processing the content data for presentation.
